

Dear Social President,

I am writing to you today from "whitegenocideproject.com" Go to our website and you will discover that your university has been taken over by black supremacist. If a white person is ever accused of violating one of their codes, it will be a black man who oversees your hearing. It will be another black man who will impose your sentence. They will be supported by the black female lawyer and the black female title 9 official. They will find you guilty if you are white. Unlike the [REDACTED] who was never punished for sexual harassment of three white female student coworkers.

This letter is a warning. They will tell you that they are not racist. Do not believe them. Jack Thomas hired all of them because they were black. They were not qualified for their positions, they were put in place to help him carry out his black agenda. White students will soon become the minority as more of the Chicago blacks come to school at Western. Look up the background on these people and you will see that your education is threatened.

Jack Thomas
